FusionBanking Essence Mobile
Software overview

Smarter banking

Mobile solutions for the smartphone generation
“The ‘mobilCIB’ service delivers information and services to our customers in a way that was not previously possible, adding an extra dimension to our e-banking services. FusionBanking Essence Mobile has proven both reliable and stable whilst displaying the level of performance required to meet our clients’ expectations.”

Dr. Áron Vitályos  
Sales Director, CIB Bank (Gruppo Banca Intesa)
Supporting the major mobile operating systems, FusionBanking Essence Mobile enables banks to offer their customers innovative mobile banking functionality and reduce their time to market. It exploits smartphone capabilities such as push messaging and location services and can be integrated into any existing online banking platform and core banking systems.

FusionBanking Essence Mobile brings next-generation mobile banking to all the most popular smartphones. It provides applications for iOS, Android and Windows Phone platforms and a browser-based solution that is available for any operating system.

The platform can be integrated into an existing Internet banking system or directly into core banking or middleware systems. It includes cost-effective security components and ensures 24/7 operation. Flexible business components mean FusionBanking Essence Mobile can be implemented quickly, with full implementation support offered.

The system offers a wide range of banking services, completing the transformation of smartphones into ubiquitous m-banking platforms and enabling you to supply a perfect tool with which customers can control their finances.

Customers can keep track of their income and expenditure and use a variety of payment options including QR code and pay-to-phone payments. Public functionality is included to engage potential customers, while all users benefit from attractive visuals and easy-to-use payment methods.

Customer expectations for mobile and tablet banking are high and rising. Successful mobile banking demands a clear understanding of these needs. Misys has extensive experience in the design and development of mobile and tablet services that are easy and enjoyable to use.

FusionBanking Essence Mobile in action

The virtual bank for the new generation. FusionBanking Essence Mobile helped Poland’s Alior to launch the country’s first ‘next generation’ direct bank.

Which channels are indispensable to innovative banks wanting to stay in touch with Generation Y? The Internet and smart devices such as mobile phones and tablets. This simple fact sparked the foundation in 2012 of Alior Sync, the first Polish direct bank. The ‘Sync’ in its name represents the new bank’s aim to connect with clients and continuously synchronise their information.

Alior Sync launched its services on web, iPhone and Android platforms using FusionBanking Essence Mobile solutions from Misys. These made it possible for Alior Sync to implement full banking functionality while at the same time creating an attractive user experience.

Customers can monitor their whole account history via their mobile devices, manage card functionality or even create a new deposit with just a few taps on the screen. FusionBanking Essence Mobile enables customers to control their finances, transfer funds and pay invoices using their handset cameras, anywhere, anytime.

In addition, customers can post pre-defined messages to their Facebook accounts via an integrated share function. Using this cutting-edge innovation, they can directly transfer money to a Facebook profile with the help of the “Alior Payment” app, a special application and bank account accessible for Facebook transfers. All these transfers can be carried out securely without the need to leave the page or log on to the bank’s Internet channel.

“Misys was definitely the right company to develop the technology for Alior Sync. Misys has the experts and the innovation experience to drive new banking technology. Misys was prepared to make our ideas come to fruition, and with them we were able to build up the most innovative bank in Poland.”

Mr. Wojciech Sobieraj
President of the Management Board,
Alior Bank
FusionBanking Essence Mobile has been specifically designed to meet the demands of today’s mobile users and the latest generation of mobile platforms.

When it comes to mobile banking apps, user expectations are high. Smartphones have revolutionised the way people use their mobiles. The number of people browsing the web, downloading apps, games and news or joining social media networks via phone has risen significantly. So to adapt to these breakthroughs and meet new customer requirements, we’ve delivered a best-in-class banking app for banks with a drive to innovate.

Out in front
The mobile platform is part of a complete front-office digital banking solution adopting an omni-channel approach with mobile-optimised ergonomic design. A continuously extending set of unique features will help you out-innovate your competitors.

Integrates seamlessly
The flexible system dovetails with your existing online banking platform, with the capability to integrate directly with your core systems.

Bank anytime, anyplace, anywhere
The FusionBanking Essence Mobile front end enables banks to provide customers with first-class services that go way beyond mere transactions. You can update your customers about new offers, rates and services – effectively turning mobile banking into a real-time communication platform.

Complete and customisable
The system offers full functionality for the major mobile platforms either as a smartphone app or to work on mobile browsers. The open API allows you to introduce cross-platform as well as platform-specific content.

High level of security
The system offers leading security, based on real two-factor authentication for online banking. It includes standard token functions, such as one-time password, challenge/response and transaction signing, alongside extra features like QR code signing and signature templates for speed and convenience.

“Misys has provided exceptional skills and service during the mobile banking implementation project, and demonstrated thorough knowledge in the areas of internet and mobile banking. I have been very satisfied with their efforts for the past ten years.”

Éva Hábori
Head of IT Development, CIB Bank Ltd. (Gruppo Banca Intesa)
Product capabilities

Relevant information
The home screen includes a ‘bank feed’, presenting the most relevant information to the customer in a single event timeline – as in many social media services.

Customer enquiries
The system handles enquiries relating to accounts (overview, balances, transaction history), deposits (overview, create, cancel term deposits) and cards (overview, balances, transaction history), all through the mobile application, reducing processing costs for the bank.

Customer transfers
Your customers can process payments by QR code or by phone number, transferring funds between their own accounts or to a third party.

Public functions
The system makes life easier for your customers with offers and news including FX rate calculations and an ATM and branch search. They can activate or de-activate cards and change their daily card limits, all from their mobile phone.

Excellent customer experience
Across devices FusionBanking Essence Mobile provides a clean and easy to navigate interface without waiting for pages to download.

Location based services
Due to the capabilities of modern smartphones, the application can provide information on the current location of the device, therefore users can easily find the nearest ATM or branch. Current location and directions are seen on Apple, Google or Bing Maps.

“UBS Switzerland has fully redesigned its e- and mobile banking service providing its clients an entry page that can be tailored to their individual information needs, improved user navigation and tablet-optimised presentation. One of the new features is the Personal Financial Assistant, developed by Misys. We believe that with these innovations UBS is making online banking simpler, clearer and more personal.”

Andreas Kubli
Head of Multichannel Management & Digitization at UBS Switzerland
**Push messages**
A simple and secure channel to push messages directly to your customers at no cost. The application leverages the push message services of mobile platforms, so you can send personalised information to customers – straight to their pockets – about card transactions, balances, term deposits and credit card warnings.

**Mobile optimised solution**
The design and implementation responds to the user behaviour and environment based on the screen size, orientation and operating system of their device. It offers real native components with eye-catching animations based on the mobile OS.

**Smart tutorial**
Misys FusionBanking Essence Mobile guides the user through the basics in a very visual way. The user can navigate with swipe gestures between the tutorial steps.

**Intelligent authentication levels**
The application can run in three different authentication levels that determine the range of the available functionalities and their behaviour.

**Accounts**
Account Information provides a brief overview of the account holder, available account balances and a full list of transactions.

**Peer-to-peer payments**
FusionBanking Essence Mobile helps your customers to quickly initiate banking transactions. If there is a need for making an immediate payment, rapid payment information can be shared peer-to-peer between the parties involved.
Professional services and customer support

“Misys Digital Channels’ support is excellent: repeatedly they have proven that customer satisfaction is their primary goal. Their staff has been responsive to our requests and managed the work schedule well.”

Bank of Valletta

Best-practice delivery
The Misys delivery model is incorporated into our entire product lifecycle. We leverage best practice business processes in the design, development and quality assurance of all of our products. While we acknowledge that one size doesn’t fit all in financial software, we know that a delivery approach that focuses on industry proven best practice process models helps our clients to save costs and benefit from the institutional knowledge Misys has developed across thousands of successful implementations. It means:

- Faster implementation: Repeatable delivery means projects are shorter and more predictable.
- Reduced TCO: Clear focus avoids unnecessary expenditure.
- Less risk: A standard, proven approach means many risks have already been mitigated.

Centre of excellence
Co-located with our development teams, the 200-strong Misys Service Delivery Centre ensures that we share best practice both internally and with partners. It enables us to refine implementations offsite before taking them back to the client.

Customer support
Misys clients benefit from the expert knowledge of 1000+ resources worldwide whose primary function is to provide professional, scalable software support and maintenance.

Deep domain expertise: Our technical and application support people have strong industry and product knowledge with continuous technical and industry training programs to ensure that Misys support teams can meet your evolving business needs.

Scalable support model: As a Misys client, you can choose from a standard, professionalised support model or a specialised, premium support package depending on your needs. Because Misys support has a broad, global footprint that operates in all time zones and regions, Misys teams can scale to your requirements.

Valuable advisory services: Our Systems Advisory Group (SAG) provides system reviews to help clients understand how to use their Misys systems more effectively and derive maximum value from their applications.

SAG reviews have helped more than 80% of participating customers to identify ways to utilise their Misys software more effectively and use more system functionality.
Proven award winning solutions
